

Jarvis Bamboo

Bamboo top

Jarvis Bamboo is the perfect adjustable height desk for both environmentally and aesthetically conscious standing desk users. We use sustainable bamboo harvested without pesticides or fertilizers, and its beautiful color comes only from the kiln, not from any chemical dyes or stains.

Frame

The Jarvis frame has an industry-leading 350 lb. lifting capacity and we offer two desk range options: Extended Range and Mid-Range. Our mid-range option doesn't go as low or high, but works for 85% of adult heights. Heavier steel feet and a lifting column that's wider at the bottom means a more grounded desk.

Jarvis Bamboo

Top specs

- Material harvested by hand preserving root structure
- We use Moso (Mao Zhu) species bamboo, sourced from sustainable forests
- European E1-level glues; German wear-resistant UV coating
- Thickness: All grommeted and non-grommeted tops: 3/4" thick (20mm)

Top options

- Rectangle or contour
- 30"x27", 36"x27", 42"x27" [rectangle only]
- 48"x30", 60"x30", 72"x30", 78"x30" [rectangle & contour options available]
- Grommet holes for tops 48" and larger are positioned on the back left and right edges of the desk (near where your computer might be). Tops 42" and smaller will come with a single back centered grommet hole.
- The drilled openings are circular and measure 80mm (approximately 3.15") in diameter.
- Covers are available in Black or White.
- We also offer powered grommets, which are also available in black or white.
- Our powered grommets include one AC outlet, one USB-C and one USB-A port, so you can plug in up to 3 devices per grommet. You can upgrade zero, one, or both of your grommets.

About Bamboo

- Truly sustainable: fully mature trees in 5 years
- Bamboo releases 35% more oxygen than equivalent trees
- No pesticides or fertilizers required for growth
